

Catálogo de revistas que pueden consultarse en la Hemeroteca de la Facultad de Medicina

La Hemeroteca de la Facultad de Medicina

Rolando Bandala Reynante*

Imposible sería hablar de la Hemeroteca de la Facultad de Medicina, sin ligar a ella el nombre del maestro Dr. J. Joaquín Izquierdo, quien en una de las facetas de sus innumerables aportes a la educación médica fue el creador y director de la magnífica organización de dicha institución.

Inaugurada en 1934 a iniciativa del propio Dr. Izquierdo, incorporada como una sección al Departamento de Fisiología y teniendo como núcleo para su acervo bibliográfico una colección de 30 tomos de publicaciones periódicas, probablemente compradas por los Dres. Don Manuel Carpio y Don Ignacio Alvarado, y habiendo obtenido la colección completa del *Journal of Physiology*, parte por donación y parte por compras, inició su servicio. Su riqueza bibliográfica, que en la actualidad se obtiene a base de suscripciones, constituye una de las colecciones más completas en Latinoamérica sobre las materias básicas en ciencias médicas.

Instalada en su inauguración en el primer piso del segundo patio de la antigua Facultad, tuvo que extender su estantería en 1945, debido al número de volúmenes acumulados, hacia el mezzanine inmediato superior. Al transladarse a su nueva ubicación en la Ciudad Universitaria, la Hemeroteca experimentó una innovación completa buscando la comodidad de los estudiosos que concurrieran a ella.

En sus instalaciones del antiguo edificio, se constituía en un solo salón a base de estantería abierta y ornamentada en sus paredes con los retratos de eminentes fisiólogos. Al ocupar sus nuevas instalaciones, comprende una superficie de 404 m.² dividida en dos secciones, situadas una por encima de la otra en los pisos 4o. y 5o. del ala de laboratorios; en el piso superior se conservaba el acervo y en el inferior la sala de lectura. En el presente año se está llevando a cabo un intercambio de estantería y escritorios de estudio entre una y otra sección, para que en ambos funcionen como sala de lectura a base de estantería abierta.

El número de volúmenes que contiene es de 7.771, para un total de 209 títulos de publicaciones periódicas que se reciben; el número de lectores asciende anualmente a 6.000 y consultan aproximadamente 16,000 obras, en su mayoría sobre las materias básicas de Facultad.

A partir del último trimestre de 1967, con la autorización de las Autoridades y en acuerdo con los Jefes de Departamento se convirtió en la Hemeroteca General de la Facultad de Medicina.
